 About 50 minutes by JR to Nasushiobara
 About 90 minutes by JR to Ashikaga
 About 60 minutes by JR to Tochigi
 About 50 minutes by bus to Mashiko

Japan heritage

— Utsunomiya with its mysterious underground labyrinth and Oya stone culture —

Just how far does this space of chilly air continue? In the enormous space where the walls stand tall and the pillars stand orderly in lines, the overlapping shadows of the illuminated pillars go on and on. When you turn between the pillars, the same stone scenery greets you again, and gradually you lose your sense of direction.

Oya stone mining began in the Edo era and developed as one of Japan's leading quarrying industries, shipping 890 thousand tons a year at its peak, forming a giant labyrinth under the ground. Visitors are attracted to the area of Oya stone production in Utsunomiya where the culture of mining stone and handling the mined stones continues unaltered.
